CoGrammar Code Review

RECOMMENDATION ON APPLICANT SUBMISSION

Review ID: 0405SBOV

Applicant: OJO ABIOLA VICTOR

Email: ojoabiolavictor@gmail.com

Applicant Submission: https://github.com/victor-shagor/Quick-credit
App / UI Url: https://victor-shagor.github.io/Quick-credit/UI
Pivotal Tracker Board: https://www.pivotaltracker.com/n/projects/2328144

Scoring Key:
0 - Does not meet expectations
1 - Meets Expectations
2 - Exceeds Expectations

Challenge 1: Create UI Templates

Criterion	Score (0 / 1 / 2)
Project Management	2
Version Control with Git	1
Front-End Development	0
UI / UX	0

The applicant demonstrated excellent use of Pivotal tracker for the project breakdown. They showed an understanding of the differences between bugs, chores and features.

While the use of Github was good, the applicant made very little commits and use of branching. They also lacked a well detailed ReadMe file.

The applicant made use of HTML, CSS and Javascript across the website. While the applicant did all the required features, they had quite a few structural issues with their

code. For example, linking an external CSS outside the <head>, or having javascript code inside the HTML, which could have been avoided easily.

The directory and file structures needed improvement. While the applicant demonstrated good use of Javascript, they made too much use of it, making the admin page too dynamic which creates a bad user experience in terms of navigation.

The website also lacked in responsiveness and the flow could make use of some improvements to facilitate navigation through the different pages.

Detailed feedback / comments

The applicant has given this challenge a good try and while they successfully developed all the pages, they did not demonstrate enough skills overall. The applicant should focus more on building their skill set and polishing their work flow.
